Dear John:

Thought I would take time to drop you a note. If you remember, when I spoke of President Reagan's life being in danger in the Philippines as well as somewhere else in the Orient, I felt it would have Communist backing. Also I said that I saw the face of a Japanese Kabuki or Geisha and felt it had something to do with Japan.

I believe Reagan cancelling the trip to the Philippines secures some level of safety for himself but I still believe he is still in danger. I also feel now that maybe the second attack I saw with the bomb or missile explosion concerned the event in Burma. If you recall, I said that I saw a car under an overpass at the time of the explosion. It turns out that the President of Korea was caught in traffic and was late in arriving for the ceremony. If not late, he would have been there at the time of the explosion. Then, I went Sunday to get a paper and what do I see on the front but a Parade Magazine with a Geisha girl.

I pray that Reagan will be safe and am hoping that the two events I saw take place are now in the past, but I believe that, for a time, we must still try to place President Reagan in White Light to protect him. He is in greatest danger in November, I feel.

Now I turn this over to Cato -

P.S. Please give copy of this to Kaye and Parade Magazine cover to keep for book use, maybe.

Dear John: .

Beloved Brother in Light - Greetings. To complete the statement concerning Jim's meditation and follow up events concerning the possible assassination attempt on Reagan, you can see that the energy put forth kept the President from going to the Philippines, where he would have been shot. Remember too, that for every action in the universe, there is a reaction. So we see this as well in the situation recently in which there was an attempt to get at the President while he was playing golf. Because the energy to attack and attempt to kill the President had been put into motion, it was necessary to dissolve this energy through some action. Thus, the collective force for destruction was disarmed through the action at the golf course.

We hope that this will resolve the attempt on Reagan's life but we already know of other pending dangers for him. We thank all those in service of light for helping with the dissolving of this last destructive attempt and we hope we can help to keep other such destructive action from manifesting.

Daily send forth light into the world and ask all of humanity to look up and see the Light of God. As well, daily, see each leader of governments of the world surrounded in Light and Learning to find ways of existing in Peace and Harmony.

Until next time beloved brother,

A servant in Light,

CATO

Now I turn this over to Cato -

SERVANT OF LIGHT AND BROTHER IN SPIRIT

Greetings from myself and the Masters of Light who reach out daily in Service to Mankind. We are overjoyed at events as they are progressing well to fulfilling the securing of the foundation and its works. We are pleased at being able to work with Jim more and truly expressing the Light as it is needed greatly at this time.

There is now coming at this time in Man's Evolution a great dispensation of God's Blessing upon the Earth, which many will call "A Great Revival," and it is, but it means much more than that alone. The only true gift that God gives to Mankind is His grace and with this grace mankind slowly moves forward in its evolution and growth back to God awareness.

The last great dispensation began in 1905 and influenced greatly the Scandinavian countries, the Middle East, China and Russia. Today in 1983 there is a new energy of grace coming into the world which will again affect major parts of the world. To place all this in better perspective, I believe we must look deeper and see the "Why" of the dispensing of Grace.

Dispensation has several interpretations, one being "the ordering of events under devine authority." So it is here meant, the ordering of events. Most people see it only as a great outpouring of God's love and Blessing, but the question of "Why?" is seldom if ever asked. The answer to the Why is as follows.

God, in his love for mankind and in His Grace, always grants a special Blessing and outpouring of his Spirit on humanity before a major balancing of Karmic debts

humanity must experience and balance. If we look back in the early part of the 1800s, there was a great revival and outpouring of God's Blessing before the Civil War and the Napoleonic Wars. Then again, in 1905, a great outpouring began of God's mercy and Blessing which was so tremendous and affected so many lives and peoples and countries that it was even written about as the "Great World Revival of 1905." After this great outpouring and dispensation World War I broke out, Europe and its governments were again changed radically - then the Great Depression and World War II.

Now we see yet again a great dispensation of God's Grace upon the Earth and its humanity. This is what Jim witnessed the beginning of in Egypt at the Great Pyramid in November of 1982. Hierarchy, the Masters of Inner Light and Great Saints and Sages are all working to dispense the Grace and Light of God in preparation for the "ordering of events under Divine authority," the dispensation.

You could say that the Revival of Spirit, the Great Outpouring, is like a Booster Shot for Humanity so that they can survive the great "events under Divine authority, the balancing out of Mankind's karma. And so we see today with this new Blessing from God a new wave of Spiritual upliftment - Men and Woman reaching out to help Humanity with understanding and preparing for the coming "events."

We see with this new outpouring of God's Breath a new drive for world peace and so many millions join hands around the world as brothers and sisters asking the governments of the world to disarm and live in peace. We see from this outpouring, people reaching out to the needy poor and hungry as they try to feed the starving of the world with the surplus of food in many countries. Stop World Hunger has become this drive and this call to Service. We see, through this outpouring, a call to return to God and away from the world and millions respond. Religion and

peoples' faith, internationally, are stronger now than just a few years ago.

But again, Why? How does a child learn? Through trial and error, and so it is with the soul of man. We learn through trial and error. We try out a certain path to see where it might lead us. We learn if something works by trying it out. If it works, fine. If it doesn't, we take the error in it and try to correct the situation so it does work.

And so Mankind throughout history has evolved and become humanity of today. But we got here not without some mistakes and we got here not without pain. So as in all of creation, a balance must be reached. So we find mankind ever experiencing the Law of Balance moving throughout its very being.. "As you sow, so shall you reap" the sages of old taught us and so these words ringthrough with truth today.

The Revival has begun with the dispensing of God's Breath on the Earth. Why a revival through a dispensation? Man's soul has lived both in the Heart of God and in the Heart of the Earth. In other words, he has experienced Being focused on God and Being focused on the Earth. Now it is time for man to balance his view and focus once again on God but with full understanding of the Earth or Physical Universe. The revival means just that - for one meaning of revival is "to bring back life or consciousness." And so it is that the Breath of God as it moves in our lives helps us refocus on God and brings to consciousness or revives our true nature. If we are to go through a balancing, either personally or as a part of humanity, we must have our focus clear and just, with understanding and with a desire for balance. The focus must be upon God and the understanding must be of the nature of God within us.

Thus we first see a dispensing of God's Breath to awaken or revive man's spirit and focus his consciousness in preparation for the next dispensation, the cleansing or balancing of the karma humanity has created. So here we see actually two different dispensations. One, the first, being a dispensation for inner awareness and upper focus and a revival of the God spirit in man. The second dispensation is for outer balance so that once again the inner life and the inner awareness might be better expressed in an outer manner.

The question arises, why does God's Grace have to function in this manner? It is because of the nature of the physical universe that God must function in this way in order to bring balance, harmony, stability and growth to the soul of humanity. Remember the Soul of Humanity and not the physical world of humanity. This is vital to understand if one is to understand the reasoning and purpose of Dispensation.

Man's soul is a spark of the Divine. Its true nature is God and is meant to reunite Conscious Oneness. What keeps the soul from being conscious of its Divine Oneness is that its focus has been clouded by the mind. Body or physical man is an anchor, which holds man's soul in bondage in the physical universe through the aid of the mind. Where man's mind is focused, so also is his soul focused. In order for the soul to be finally free for union consciously with the Father, the soul must be freed from the mind. Involvement, life after life, in the physical body and the physical universe has slowly anchored man's soul here in this level of being. With the emotional nature first being the hook which caught up the soul and with the development of mind, the soul was firmly anchored here in the physical. This is why humanity senses a separateness of himself and God, for man's soul is focused with the mind in the physical universe, while God dwells in the Spiritual Universe

To further complicate the bondage of the soul, man began to get caught up in debts owed through the law of karma or balance. The indebtedness developed one life to the next and the karma created was owed person to person, tribe to tribe and country to country. Through this the soul has slowly been spun into a physical web becomes more and more inextricable.

If the karma that mankind has created for itself from the beginning of its existence had been allowed to run its full course without God's grace, this world and all involved with it would have been destroyed long ago. Such is the weight of the karma created by humanity. Only through God's grace has humanity and this world been able to survive to this day and time.

The reason for God's concern and his Grace to help maintain a world which seems so strongly aimed at total destruction becomes clear when you realize that in order for the soul to be freed from the physical universe, the soul needs a physical expression to become freed from. This is why this physical world in the physical universe is so important.

In order to keep the weight of the karma that humanity has created from totally destroying all life and possibly even the Earth itself, God has seen fit to intercede and work with his grace to help in dispelling the total destruction. This has been accomplished in several ways. Of course, the ultimate responsibility must again be on humanity's shoulders with their attempt at not creating such destructive karmic patterns. But until humanity can fully realize their responsibilities and handle them as mature souls, the Creator has taken steps to redirect much of the Karmic impact so that rather than having total destruction from which humanity could not rebuild, he has seen fit to use the dynamic force of the Karma to tear down the old destructive elements and then rebuild on a stronger foundation from

which humanity can grow.

One way that this has been handled throughout the eons of man's existence has been through a collective act in which much of the Karma is held off and collected for a time. Then at proper points in time an outpouring of this energy takes place, which creates political, economic, religious or moral collapse or strife. Sometimes this energy will also manifest as war or civil revolt. In this way mankind reaps what it sows, but through God's Grace the harvest is not always given at one time but in different seasons of man's evolution. Also God, through his dispensation of this karma in this manner has used it as a tool to educate humanity and help it to continually grow, both in knowledge of the physical and spiritual universes.

Another way in which God helps in the handling of this karma is through the process of having certain spiritual masters in the world, serving as a focus of the Divine Grace and Will of God. These great selfless servants work with the energies that humanity creates daily, attempting to balance the energies with an infusion of Light into a high magnitude into the pattern humanity creates. In this way some of the imbalance is corrected immediately so that a level of balance, hopefully, can be obtained in the future. Other Masters of Light and Vibration work with humanity on a conscious outer level attempting to upgrade the vibration mankind creates on an emotional and mental level.

As well, there are Masters of yet another level of service working on the causal planes of Earth, attempting to balance the astral karmic pattern, which so influences the nature of man's response on an emotional level to the physical world around him.

Through all of this, God is ever reaching out his Divine Hand of Grace trying to

CATO - page 7

help mankind in his growth and evolution to God Consciousness.

Through the outpouring of My Breath  
Life is given this Day  
The souls of all much become as One  
To live in harmony.

I stretch out my Hand  
I send forth my Love  
I give to all my Peace  
That the world might know me.
